Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a fuel cell having a porous water-absorbing tube, classified in class 429, subclass 34.
- II. Claims 9-14, drawn to fuel cell stack having an inlet side communication hole, an outlet side communication hole, and a discharge hole provided at a deep portion, classified in class 429, subclass 17.
- III. Claims 15-19, drawn to a fuel cell stack which includes a suction member which is provided at the inside of the inlet side communication hole or the outlet side communication hole and which has an opening for sucking retained water, classified in class 429, subclass 39.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, or different effects. The invention of Group I requires a porous water-absorbing tube which is not required by inventions of Groups II or Group III. The invention of Group II requires a discharge hole provided at a deep portion, which is not required by Groups I or III. Group III requires a suction member, which is not required by Groups I or II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required for each Group are distinct, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
